#### **BACKGROUND**

The Texas Health Care Information Council (THCIC) was created by Chapter 108 of the Texas Health and Safety Code (THSC) and was responsible, under Sections 108.011 through 108.0135, for collecting hospital discharge data from all state licensed hospitals except those that are statutorily exempt from the reporting requirement. Exempt hospitals include those located in a county with a population less than 35,000, or those located in a county with a population more than 35,000 and with fewer than 100 licensed hospital beds and not located in an area that is delineated as an urbanized area by the United States Bureau of the Census (Section 108.0025). Exempt hospitals also include hospitals that do not seek insurance payment or government reimbursement (Section 108.009). THCIC became part of the Texas Department of State Health Services (DSHS) effective September 1, 2004 and the DSHS Center for Health Statistics is now responsible for the collection and release of hospital discharge data.

Senate Bill (SB) 7 (82nd Texas Legislature First Called Special Session) SECTION 7.06 repeals the facility exemption sections in Chapter 108 effective September 1, 2014. Rules were adopted implementing the rural provider requirements to begin with January 1, 2015 data. Rural providers and providers that are exempt from state franchise, sales, ad valorem, or other state or local taxes, and that do not seek or receive reimbursement for providing health care services to patients from any source will no longer be exempt from the data reporting requirements of Chapter 108.

#### PUBLIC USE DATA FILE (PUDF)

Sections 108.011(a) and 108.012 of the THSC requires DSHS to provide public use data for computer-to-computer access. It also permits DSHS to charge the data requestor a standard fee for using the Public Use Data File (PUDF). The PUDF contains patient-level information for outpatient surgical and radiological services. These data are extracted from DSHS's outpatient services database. The providers/submitters have, by law, until the next quarter (following the discharge) to submit their data. This means that the PUDF data is a snapshot in time and each quarter may contain some discharges dated in the previous quarter (i.e. for calendar year data be sure to check the first quarter of the following year also).

#### PATIENT/PHYSICIAN CONFIDENTIALITY

The legislative intent behind the creation of the Hospital Discharge Database (HDD) was that the data and resulting information be used for the benefit of the public. This is specified in Section 108.013 of the Texas Health and Safety Code (THSC). Section 108.013 (c) also stipulates that DSHS may not release and a person or entity may not gain access to any data that could reasonably be expected to reveal the identity of a patient or physician. Any effort to determine the identity of any person violates the Section 108.013 and may incur penalties as stated in Sections 108.014 and 108.0141. In addition, under Section 108.013(e) and (f), patient and/or physician information in the HDD cannot be used for discovery, subpoena, or other means of legal compulsion or in any civil, administrative, or criminal proceeding. Pursuant to the THSC, DSHS excludes all direct personal and demographic identifiers (e.g., name, address, social security number, patient identifiers, admission and discharge dates) that might lead to the identification of a specific patient from the PUDF.

To protect patient identities, DSHS has suppressed these data elements in this release of the PUDF:

- The last two digits of the patient's ZIP code are suppressed if there are fewer than thirty patients included in the ZIP code.
- The ZIP code is changed to '88888' for patients from states other than Texas and the adjacent states.
- The entire ZIP code and gender code are suppressed if the ICD-10-CM or ICD-10-PCS codes indicates alcohol or drug use or an HIV diagnosis.
- The entire ZIP code and provider name are suppressed if a hospital has fewer than five discharges of a particular gender, including 'unknown'. The provider ID is changed to '999998'.
- The entire ZIP code is suppressed if a hospital has fewer than fifty discharges in a quarter and the provider ID is changed to '999999'.
- The country code is suppressed if the country field has fewer than five discharges for that quarter.
- The county code is suppressed if a county has fewer than five discharges for that quarter.
- Age is represented by 22 age group codes for the general patient population and 5 age group codes for the HIV
  and alcohol and drug use patient populations.
- Race is changed to 'Other' and ethnicity is suppressed if a hospital has fewer than ten discharges of a race.

To protect physician identities, the THSC requires creation of a uniform identification number for physicians in practice. Uniform physician identifiers are available except when the number of physicians represented in a DRG for a hospital is less than the minimum cell size of five.

It may be possible in rare instances, through complex analysis and with outside information, to ascertain from the PUDF the identity of individual patients. Considerable harm could result if this were done. PUDF users are required to sign and comply with the DSHS Hospital Discharge Data Use Agreement in the Application before shipment of the PUDF. The Data Use Agreement prohibits attempts to identify individual patients.

#### RESTRICTIONS ON DATA USE

Section 108.010(c) of the THSC prohibits DSHS from releasing provider quality reports until one year of data is available. Users of the PUDF are cautioned about using less than a year of data to make any healthcare facility quality assumptions.

Sections 108.013(c)(1) and (2) and 108.013 (g) of the Texas Health and Safety Code (THSC) prohibit the DSHS from releasing, and a person or entity from gaining access to, any data that could reveal the identity of a patient or the identity of a physician unless specifically authorized by the Act. Any effort to determine the identity of any person or to use the information for any purpose other than for analysis and aggregate statistical reporting violates the THSC and the Data Use Agreement. By virtue of the Agreement, the signer agrees that the data will not be used to identify an individual patient or physician. Because of these restrictions, under no circumstances will users of the data contact an individual patient or physician or hospital or ambulatory surgery center for the purpose of verifying information supplied in the DSHS Outpatient Services Public Use Data sets. Any questions about the data must be referred to DSHS only. Data analysis assistance is not provided by DSHS. The data are protected by United States copyright laws and international treaty provisions.

In the Data Use Agreement, the purchaser and end-user of the data are referred to as the "licensee". To acquire the data the licensee must give the following assurances with respect to the use of DSHS Outpatient Public Use Data sets:

- The licensee will not release nor permit others to release the individual patient records or any part of them to
  any person who is not a staff member of the organization that has acquired the data, except with the written
  approval of DSHS;
- The licensee will not attempt to link nor permit others to attempt to link the outpatient records of patients in this data set with personally identifiable records from any other source, **including any THCIC research data file** (effective Aug 1, 2012);
- The licensee will not release nor permit others to release any information that identifies persons, directly or indirectly;
- The licensee will not attempt to use nor permit others to use the data to learn the identity of any physician;
- The licensee will not nor permit others to copy, sell, rent, license, lease, loan, or otherwise grant access to the
  data covered by the Data Use Agreement to any other person or entity, unless approved in writing by DSHS;
- The licensee agrees to read the User Manual and to be cognizant of the limitations of the data;
- The licensee will use the following citation in any publication of information from this file:
  - Texas Outpatient Services Public Use Data File, [quarter and year of data]. Texas Department of State Health Services, Center for Health Statistics, Austin, Texas. [date of publication];
- The licensee will indemnify, defend, and hold the DSHS, its members, employees, and the Department's contract vendors harmless from any and all claims and losses accruing to any person as a result of violation of this agreement; and
- The licensee will make no statement nor permit others to make statements indicating or suggesting that interpretations drawn from these data are those of DSHS.

The licensee understands that these assurances are collected by DSHS to assure compliance with its statutory confidentiality requirement. The signature on behalf of the licensee indicates the licensee's agreement to comply with the above-stated requirements with the knowledge that under Sections 108.014 and 108.0141 of the Texas Health and Safety Code to knowingly or negligently release data in violation of this agreement is punishable by a fine of up to \$10,000 and an offense is a state jail felony. By signing the Data Use Agreement, the PUDF user has been informed that the potential for both civil and criminal penalties exists.

Users of report generating software to access the PUDF are required to purchase a license to use the data.

#### **OUTPATIENT FACILITY COMMENTS**

(Users are advised to consider hospital comments in any analysis of the data.)

Included with the PUDF is a separate file containing the unedited comments submitted by hospitals or ambulatory surgery centers at the time of data certification. Comments relating to individual data elements should be considered in any analysis of those data elements. These comments express the opinions of individual hospitals and are not necessarily the views of the DSHS. Hospitals or ambulatory surgery centers that submitted comments are identified in 'Reporting Status of Texas Outpatient Facilities'.

A Facility Type file with 29 variables, includes the THCIC\_ID and facility name. Variables clarifying the type of provider (Pediatric, Teaching Facility, Long Term Care, etc.) are included also. This is useful for data users focusing on a certain type of facility. Additionally, POA provider indicator and certification status are included.

#### **DATA FILES**

The 2016 Q1 PUDF is available in four files, the Base Data, Classification data, Charges and Facility Type Data files. The files are also available in fixed length and tab-delimited formats. The size of the files are as follows:

First quarter, 947 facilities:

Base Data	4,532,995 records	128 variables	Fixed field format	3,918 MB	Tab-delimited	1,761 MB
Classification Data	4,532,995 records	83 variables	Fixed field format	1,253 MB	Tab-delimited	597 MB
Charges	30,286,184 records	19 variables	Fixed field format	3,165 MB	Tab-delimited	2,442 MB
Facility Type Data	947 records	29 variables	Fixed field format	50 KB	Tab-delimited	37 KB

The data must be imported into a software package. No software is included with the PUDF. The data file has been tested with several software packages, including Microsoft Access, SAS, and SPSS.

Updates to any PUDF CD's are available through the THCIC website, <a href="http://www.dshs.state.tx.us/thcic/">http://www.dshs.state.tx.us/thcic/</a>, which should be checked periodically as notifications of an update will not be sent.

#### **DATA DICTIONARY**

This document provides the user with the necessary information to use and understand the data in the Public Use Data File. The following information is provided:

is provided:	
Field	Unique, abbreviated name of the data element and brief explanation of the data element.
	Descriptions of data elements are taken from specifications manuals.
Data Source	Provided by the health care facility on the claim form (Claim)
	Assigned by DSHS (Assigned)
	Calculated by DSHS (Calculated)
Type	Alphanumeric or numeric
Coding scheme	Valid codes for a data field. Values taken from specifications manuals.

Any data provided by a facility that has been determined to be invalid has been assigned the value `(accent mark). Any data element that is blank should be interpreted as 'missing', no data provided, unless otherwise noted.

#### **CITATION**

Any statistical reporting or analysis based on the data shall cite the source as the following:

Texas Outpatient Surgical and Radiological Procedure Public Use Data File, [quarter and year of data]. Texas Department of State Health Services, Center for Health Statistics, Austin, Texas. [date of publication].
